**Re: Bench Height Change Request
Permit # M/001/036
Milford Quarry**

Dear Tom:

As we discussed in our meeting on June 28, 2010 please consider this memo a request to increase the bench height at the Milford Quarry from 25 feet to 50 feet. The attached map indicates the approved mining area and benches that will be affected in light blue. We also need to increase our permitted acreage from 331.4 to 342.6. The increase is required to expand the permit area to account for areas around the loop track and sediment ponds that the previous operator affected outside the approved permit boundary. This will increase the bond from \$1,678,599.00 to \$1,735,329.00. These areas are indicated on the attached map in dark blue. The above changes will be incorporated into the permit revision that will be submitted by the end of the year.

If you have any questions or need further assistance feel free to contact myself at 913-378-1805 or Shelby Olsen at 210-219-2619.

Respectfully,
Martin Marietta Materials Inc.

James B. Nicholson
Senior Environmental Engineer
